Kenneth Allen

Milton, FL • FlaDev850@outlook.com • (850) 776-1166 • linkedin.com/KennyAllen • github.com/LeeAllenK

Skilled, detailed oriented, software engineer with a deep passion for coding. I have created successful front and back-end applications and want to bring my skills to a tech company.

TECHNICAL SKILLS

- **HTML, CSS, JavaScript, React, Node.js, MongoDB, Web Accessibility**

Experience

SOFTWARE ENGINEER | OCTOBER 2023 – PRESENT

- Built modern and responsive web applications using the best practices.
- Built semantically structured front and back-end applications.

Recent Projects:

Match Em Up Nephew

- Users must click on two separate cards to reveal the value of those cards. If the value of those cards matches those cards will be removed and the user will receive 10 points. There are 52 cards and 26 matches for a final score of 260 points. All cards must be matched before the time expires.

Make A Note (Fullstack)

- Developed a full-stack note-taking application enabling users to input and save notes seamlessly, with an intuitive notebook UI that allows for easy retrieval of up to 100 individual entries until manually deleted.

What's the Weather

- Users 5-day weather forecast is generated according to their location. Users can also search the forecast for another city using the search bar. The 5-day forecast for that city will then be displayed.

Other Projects

- My Notes, Calculator App, Weather App (**React**), Don't Forget Remind Me (**React**) and more.
